Meyer Tool is a privately held, high-tech manufacturing company supplying a variety of precision components to the aerospace and gas turbine engine industries. The company began as Meyer Tool & Die in 1951, and has evolved over the years into an industry leader in turbine technologies, vertically integrated and offering all post casting processes as the trusted manufacturing partner. Meyer Tool currently has over 1,100 electrical discharge machining (EDM) machines (wire, ram, and fast hole drilling). Meyer Tool not only specializes in EDM, but also waterjet machining, conventional machining, abrasive grinding, laser machining and welding, EB welding, coating, airflow testing and other processes required to be the trusted manufacturing partner for airfoils and other hot section turbine components.

MICROMOLD PRODUCTS, INC.

professional interiors and can be used in widely varying configurations including sliding doors, hinged doors, pocket doors, folding walls and fixed panels. The system accepts any 1/4" or 1/2" thick panel material allowing unlimited design choices. Components are extruded from high-grade 6000 series aluminum alloy with a 62% recycled content, allowing narrow profiles that are rigid and lightweight. Satin anodized finishing gives the material a soft sheen that resists corrosion and is easy to clean. PPG Duracron liquid electrostatic extrusion coating finishing may be specified and is available in a wide range of color options.
